- METRIC system
- advanced project
- comes in DINA4, US LETTER & DINA0

****MOCK UP IS A MUST AS EVERY FABRIC BEHAVES DIFFERENTLY AND EVERY BODY SHAPE IS UNIQUE****

!!PLEASE READ EVERYTHING IN THE ITEM DESCRIPTION!!

MATERIALS

- 100cm denim fashion fabric (I used 100% cotton denim, measured on a standard 140cm wide fabric)
- 30cm light weight cotton poplin for the pockets (I used 100% cotton poplin for this, measured on a standard 140cm wide fabric)
- 50cm interfacing (I used H180 Vlieseline for this)
- 140cm interfacing tape
- 30cm heavy weight interlining (I used 100% CO denim for this, measured on a standard 140cm wide fabric)
- 20cm zipper in a matching color
- metal details (I used a set of 2 press button outties)
- hooks and eye closure for pants
- matching denim thread
- sewing machine with straight stitch that can handle thicker fabrics
- overlock machine or domestic machine with zigzag/overlock stitch that can handle thicker fabrics

TIPPS AND TRICKS

Add 1cm seam allowance to all pieces if not stated otherwise.

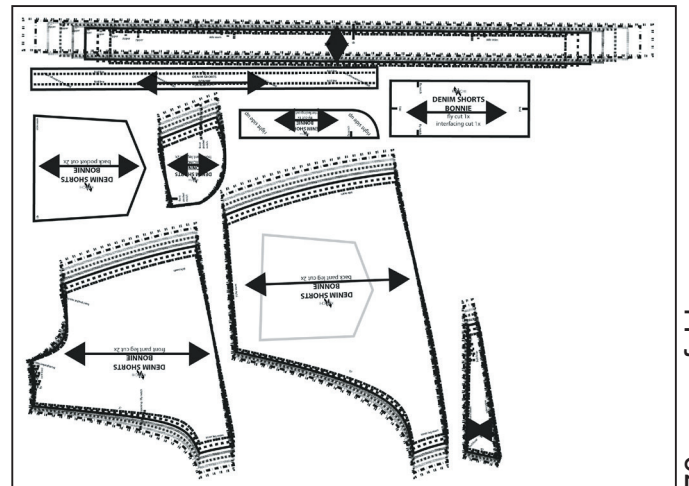

I added 1.5cm to the back pockets as it's easier to iron the seam allowance this way.

Make sure to test if your machine can handle thick fabrics. This pattern calls for sewing over up to 6 layers of fabric (at the belt loops).

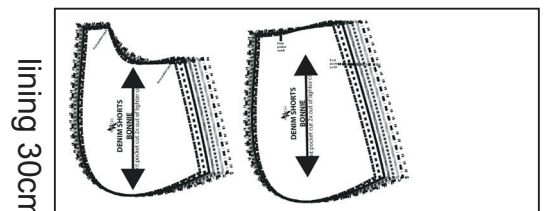

SUGGESTED FABRICS

Any thick fabric like denim or similar to denim. Canvas can also be used or upholstery fabric.
